☐

This opinion has been established on the basis of a translation from the original language into the following language

_____, which is the language of a translation furnished for the purposes of international search (under Rule 12.3 and 23.1(b)).

2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

☐

a sequence listing

☐

table(s) related to the sequence listing

b. format of material

☐

in written format

☐

in computer readable form

c. time of filing/furnishing

☐

contained in the international application as filed.

☐

filed together with the international application in computer readable form.

☐

furnished subsequently to this Authority for the purposes of search.

3.

☐

In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

4. Additional comments:

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/DE2005/000188

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-5	YES
	Claims		NO
Inventive step (IS)	Claims	1-5	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-5	YES
	Claims		NO

2. Citations and explanations:

1 Document DE 195 21 976 (D1) is considered to be the closest prior art. It discloses a device according to the preamble of claim 1, from which the subject matter of independent claim 1 differs by the constructional arrangement of the characterizing part, in particular by

the pivotably movable mounting of the articulated arm on a carriage which bears the pivoting drive and which is guided on a crosspiece on which a stationary drive for horizontal movement of the carriage is located, the entire unit being vertically displaceable by means of at least one stationary lifting drive.

1.1 The subject matter of claim 1 is therefore novel (PCT Article 33(2)).

1.2 The whole constructional arrangement defined in claim 1 cannot be inferred in an obvious way from any of the cited documents, so that the subject matter of claim 1 involves an inventive step (PCT Article 33).

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/DE2005/000188

Box No. V

Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

The proposed division of the movement axes or the drives makes a low-mass design possible where the large horizontal transport travel is carried out by the low-mass carriage and articulated arm, which makes higher acceleration and speed possible. Reduced vertical travel in comparison with the prior art is also performed.

The entire dynamics of the device are consequently improved.

- 1.3 Claims 2-5 are dependent on claim 1 and thus likewise meet the PCT requirements for novelty and inventive step.
